BİLGİ TÜRMER

İstanbul Bilgi University Turkish Language Teaching and Research Center teaches Turkish by immersing the students in the language. The program includes analytical methods on sound and structure as well as interactive applications for speech practice.

The learning methods are based on the distinct structural and semantic properties and features of the Turkish language, as this is considered appropriate for learners of Turkish. In the classes we use both books put together according to European Language Portfolio's language levels and audio-visual materials prepared in line with the needs of the students.

Participants are placed in courses based on their level of Turkish. Those without prior knowledge of Turkish start with the A1 elementary level. Those with prior Turkish language experience may start at levels A2, B1, B2, C1 or C1+, depending on the results of a placement test. Those already holding a course certificate may automatically progress to the subsequent level without the need for a placement test.

There are various additional learning tools used to support the courses. In the classroom, projectors and audio systems are used. In addition, native Turkish speakers are often invited to classes to ensure real-life simulations in a fun and relaxed environment. At the Center, the focus is not just on the technical aspects of the language, but also on fields where language intersects with real life and culture.

LOCATION

BİLGİ TÜRMER is located at **santral**İstanbul Campus, which has a reputation for being one of Istanbul's most beautiful and vibrant university campuses. There are complimentary shuttle services to the campus from the city's major hubs, including Kabataş and Mecidiyeköy. Participants will benefit from experiencing the city and college life on our centrally located campuses.
